TWave

TCloud

Remote, secure and **centralized** access to all your TWave T8 condition monitoring devices, from a single website.

www.twave.io

Easy remote access to your T8s

The secure online platform that enhances your TWave T8 condition monitoring systems.

One website for your entire asset pool

Alarm overviews and diagnostic data from all your TWave T8s are gathered in one place, so you can supervise critical assets without travelling to site.

Machines from every plant and site appear side by side, so you always know which assets need attention first.

Your T8 devices → Encrypted VPN → TCloud + Mirror → Your team

Supervise Your Machines Remotely

Quick Alarm View

The latest alarm states of every asset, and their recent changes, at a glance.

Secure Connection

T8 devices reach TCloud through an encrypted VPN, built to the highest security standards.

Find Any Machine

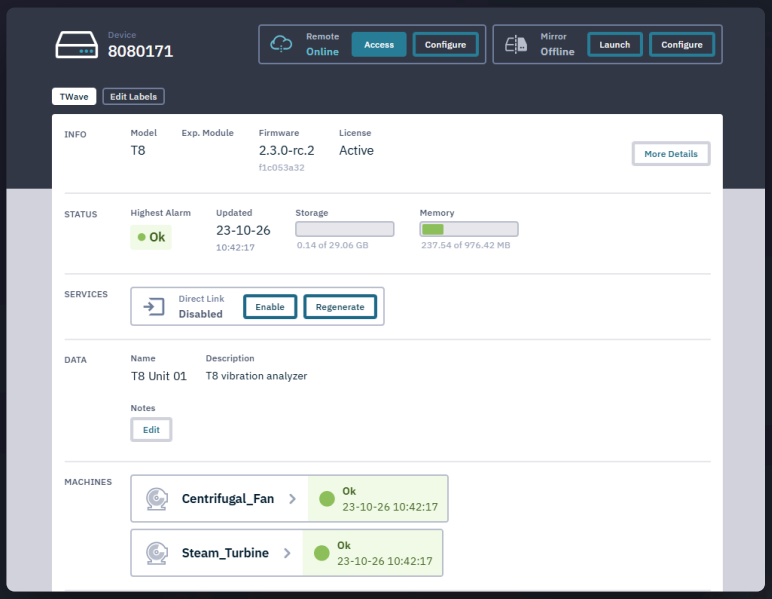

Grid or table views, search, sorting by tag, alarm or last update, and labels to organize your assets.

Centralized Access

Multiple users follow the whole asset pool with the same up-to-date information.

Always on, even when offline

The integrated Mirror service keeps a copy of each T8's diagnostic data in TCloud. If a device is switched off or loses its connection, its data is still one click away.

Plug In, Nothing Else

No extra hardware, software or network changes. The T8 only needs Internet access.

Device Status at a Glance

Model, firmware, licence, storage and memory of every T8, on its own page.

One-Click Dashboards

Each T8's diagnostic dashboards, with the familiar T8 widgets, in one click.

Two ways to reach your data

LIVE ACCESS

Real-time data, straight from the T8

Internet on the T8	**Required**
Internet on your PC	**Required**

Open the T8's own interface remotely and follow the machine as it runs, with live values, alarms and all the analysis tools.

MIRROR

Your data, even with the T8 offline

Internet on the T8	**Not needed**
Internet on your PC	**Required**

Ideal for units on remote sites or with an intermittent connection: open their data without waiting for them to come back online.

Every T8. One website.

Why TWave?

We are dedicated to transforming the way industries care for their most valuable assets

Since 2014, we have been **at the forefront of developing innovative solutions** for the monitoring and supervision of industrial machinery.

TWave specializes in **designing and producing** monitoring systems that focus on analyzing and diagnosing the operational condition of machinery.

We have earned the trust of **major global companies** and continue to expand our international presence, proving that innovation and excellence can be the driving force behind success.

New Times. New Tools.
